Citroen DS

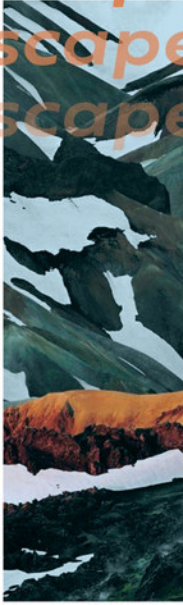

GRANDEUR

Major Project

This is an ongoing project where I have chosen to design a Citroen Ds luxury land yacht. Looking into the latest technological developments, I also want to pay homage to the classic Ds giving it a new lease of life.

INSPIRATION

Starting any project it is essential to research and find inspirations to come up with new and innovative designs. After starting my investigation looking into van life culture and interviewing people who live that lifestyle I quickly discovered that there was a gap in the market for a luxurious campervan. The exterior design in campervans seems to be stuck in a continuous cycle of boxes on wheels so was a perfect opportunity for me to create something exciting. Nautical design was another avenue I wanted to tie into this project to add an extra element of luxury to the project.

THUMBNAIL SKETCHES

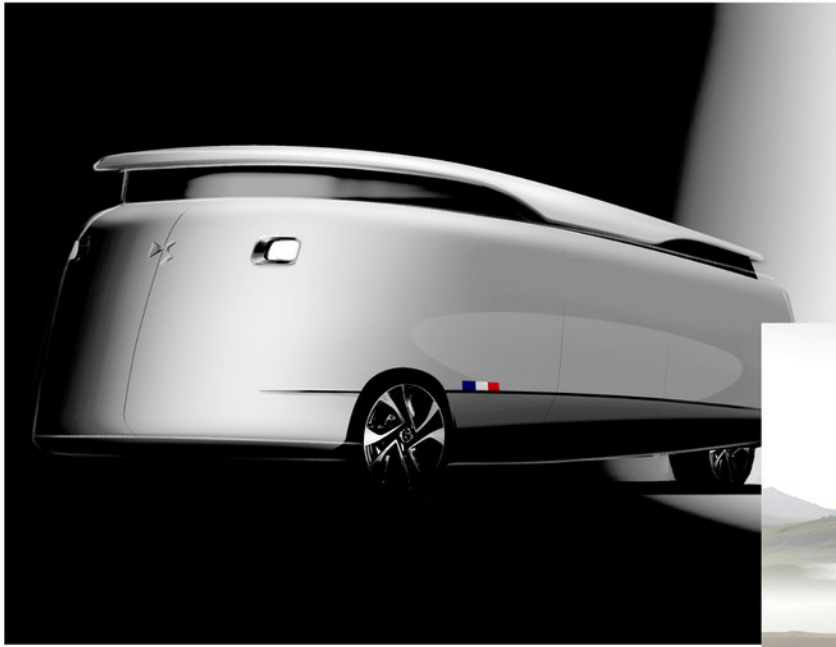

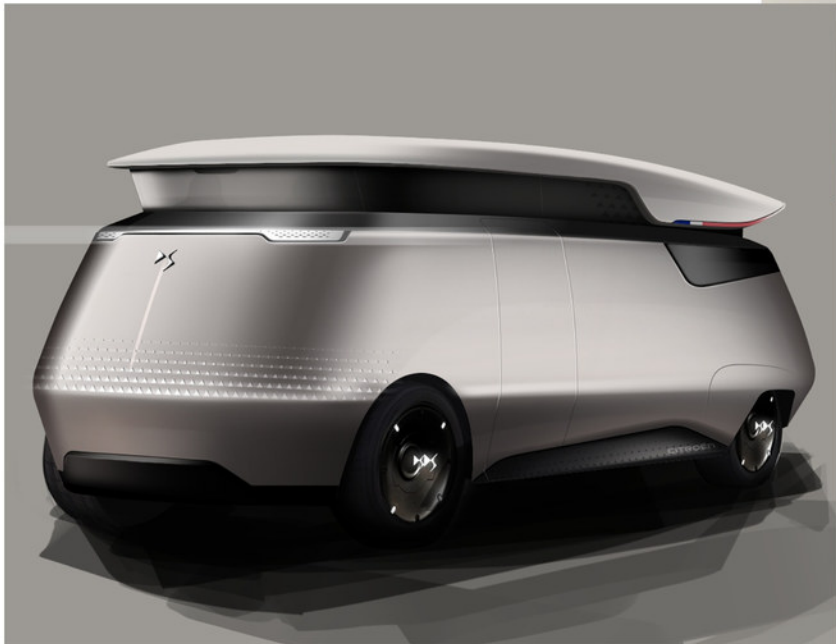

"KEY SKETCH"

This was a fundamental point in my design process where after doing my thumbnails and initial ideas I started to find a direction I was happy to start exploring more. This design incorporated the the Citroen DNA but also had the nautical design aspects I wanted to include such as the long swooping roof and angled wrap-around glass.

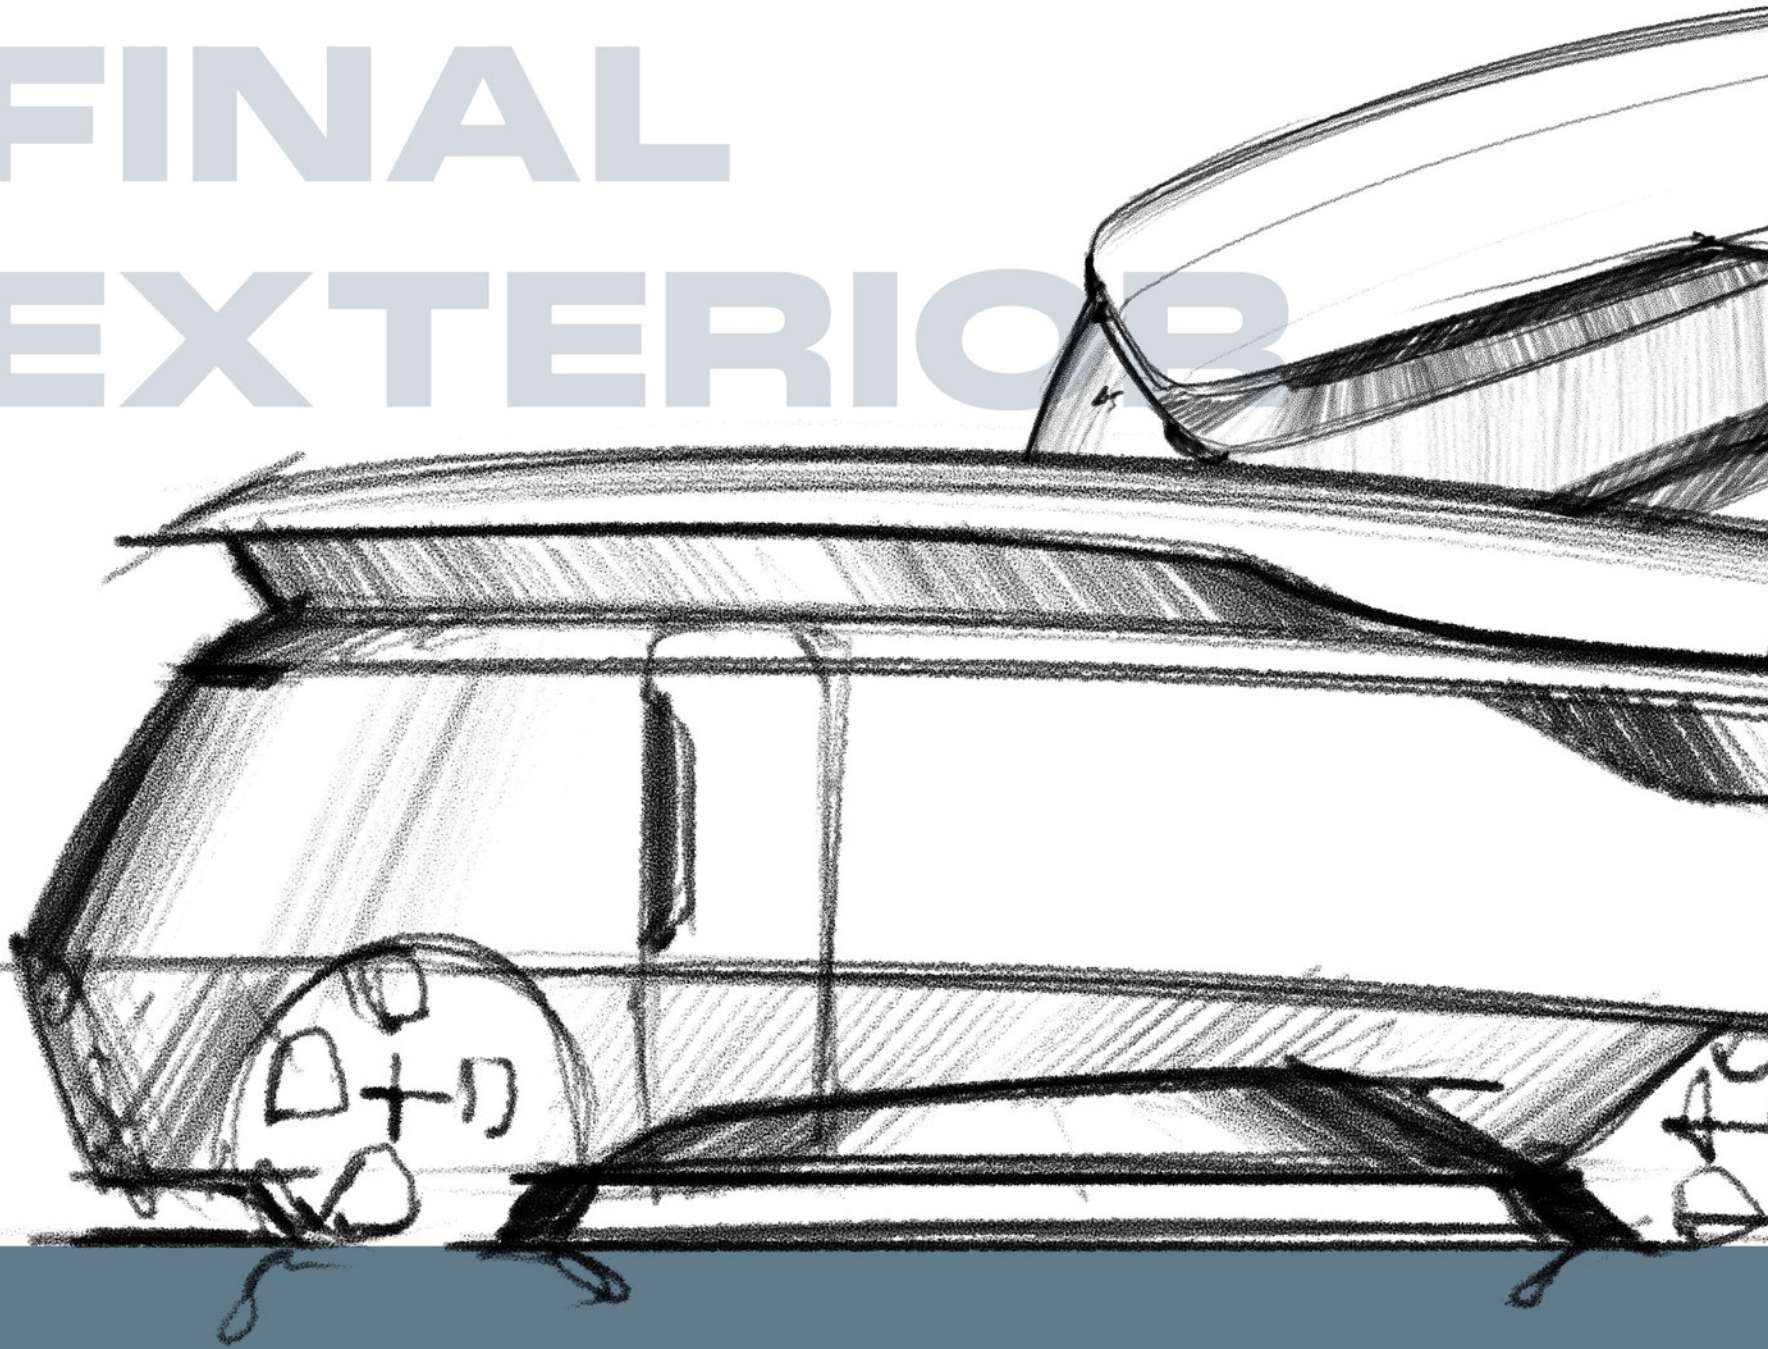

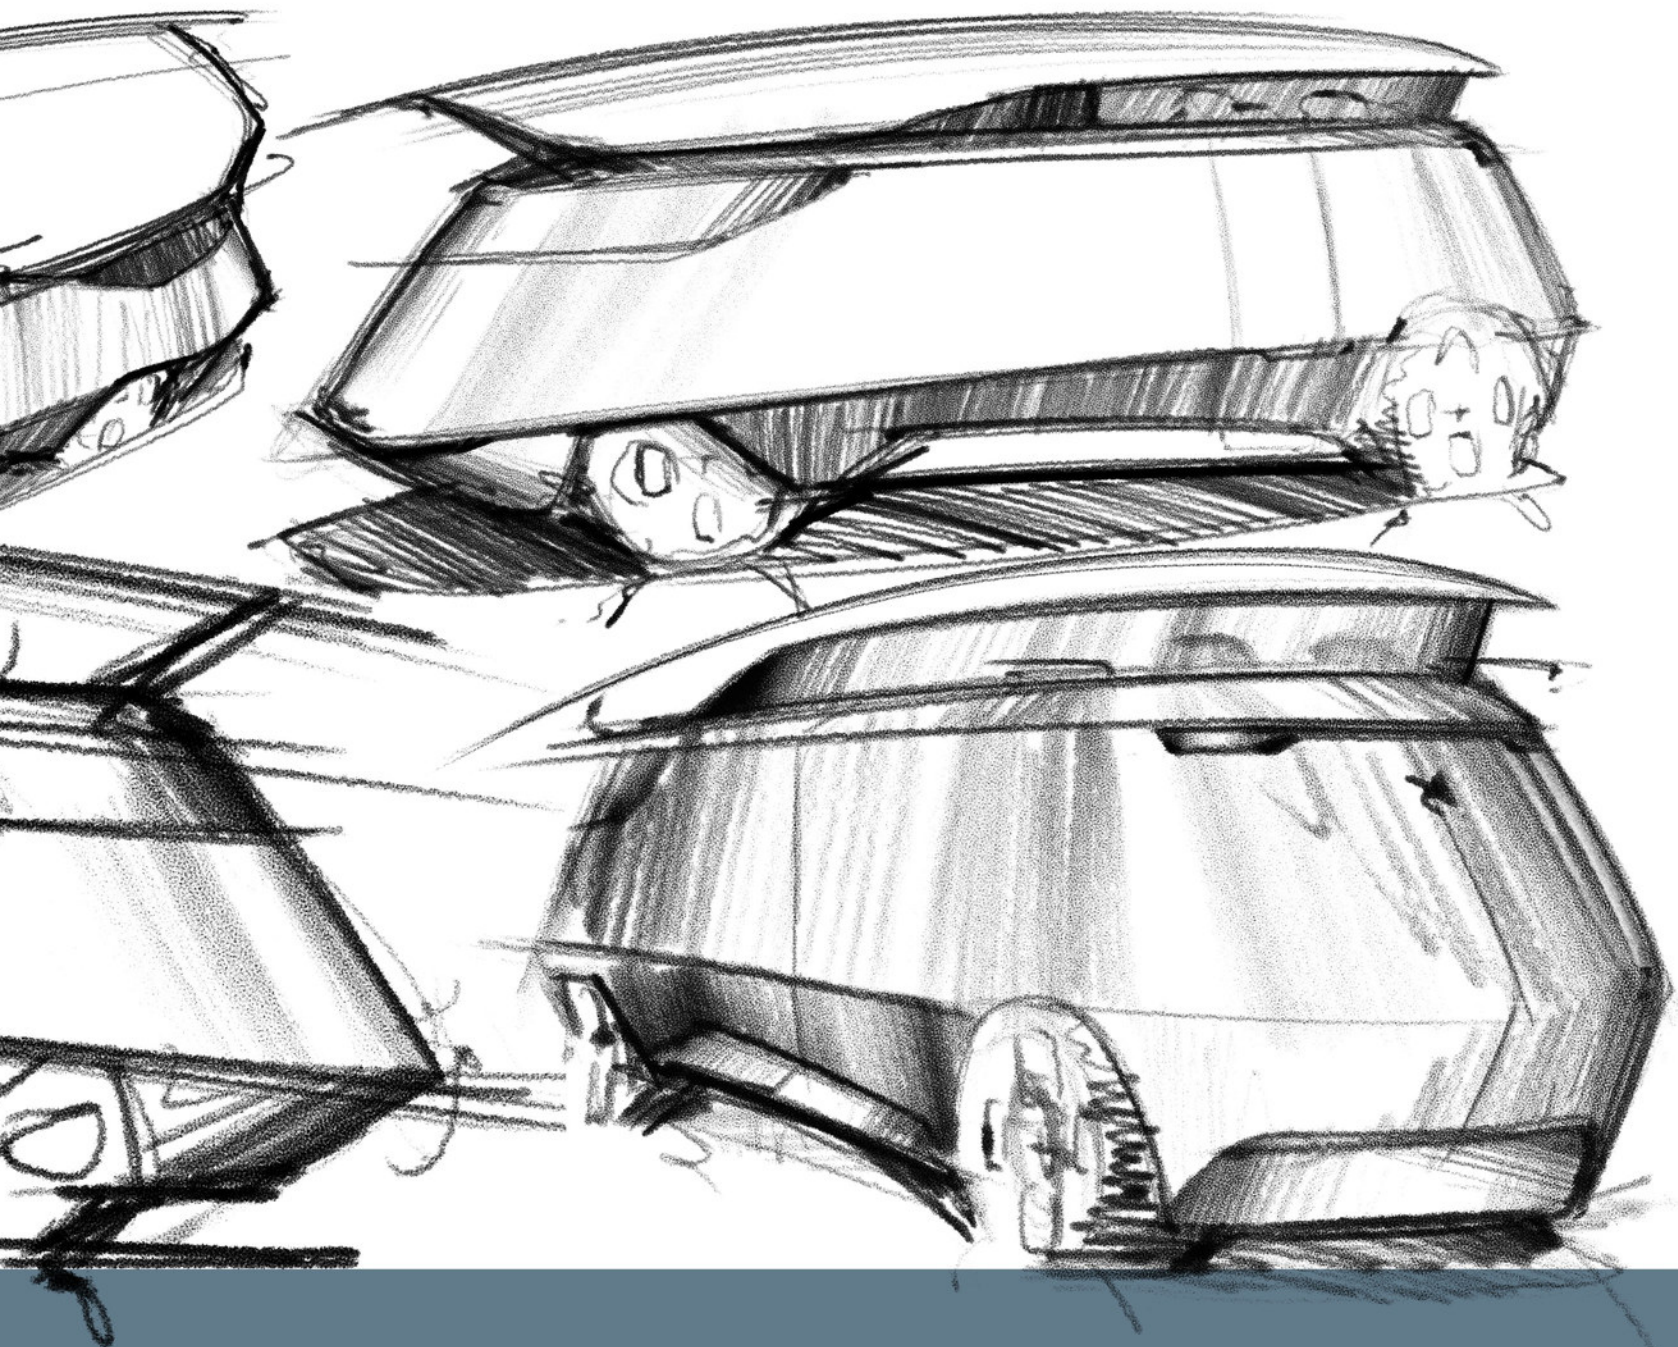

PHOTOSHOP SKETCHES

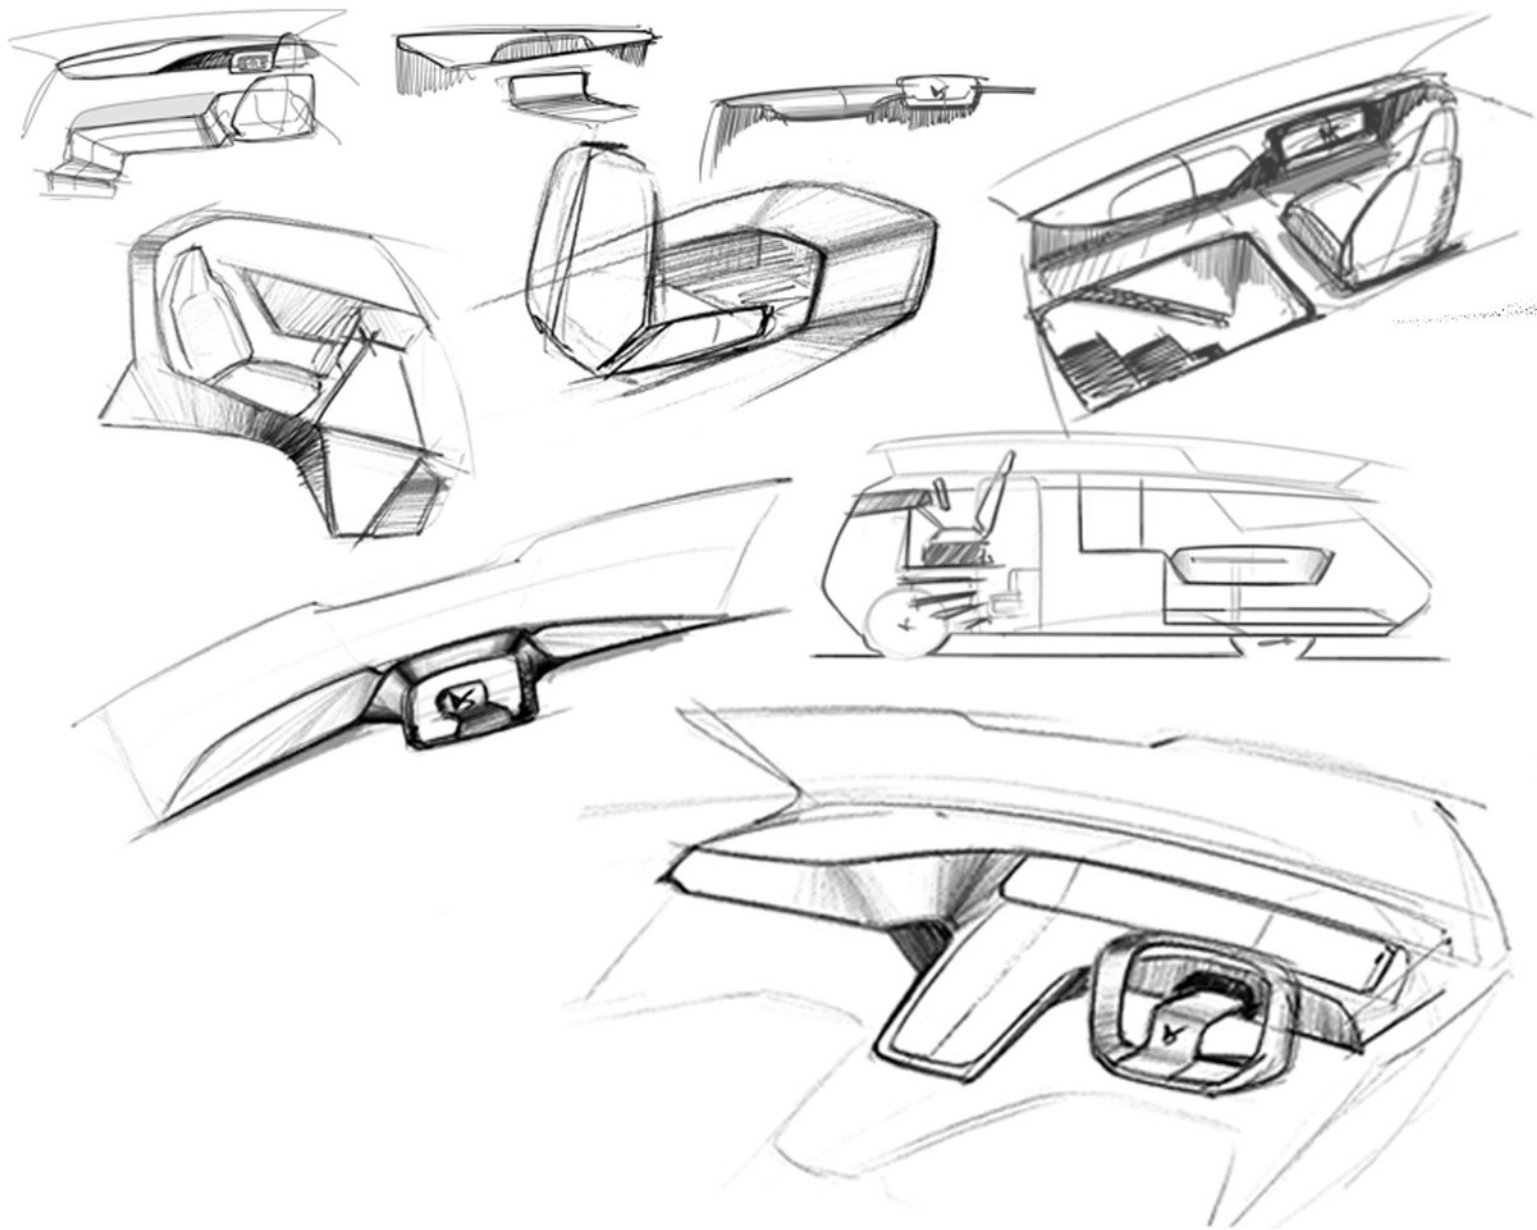

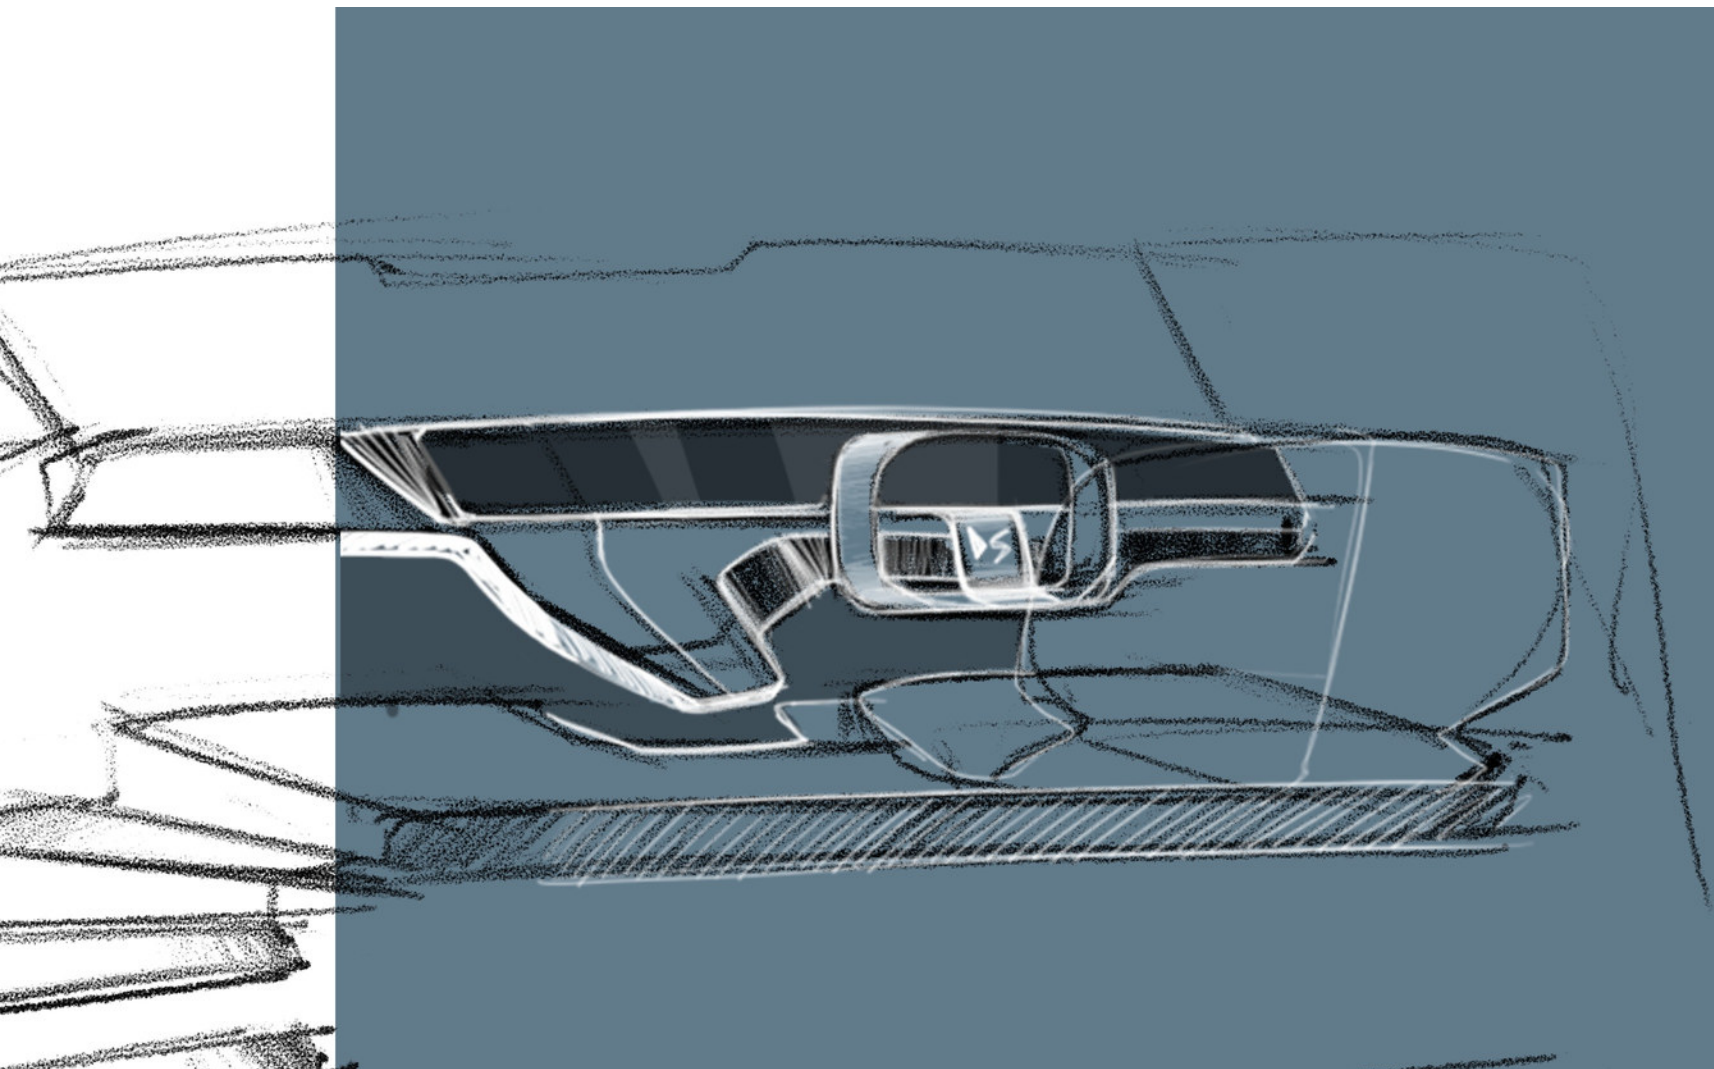

Series of Photoshop sketches of the evolution of my designs. The bottom left image was my moving closer to my final design with the pattern light and the smooth swooping roof which flows through into the window below.

FINAL EXTERIOR

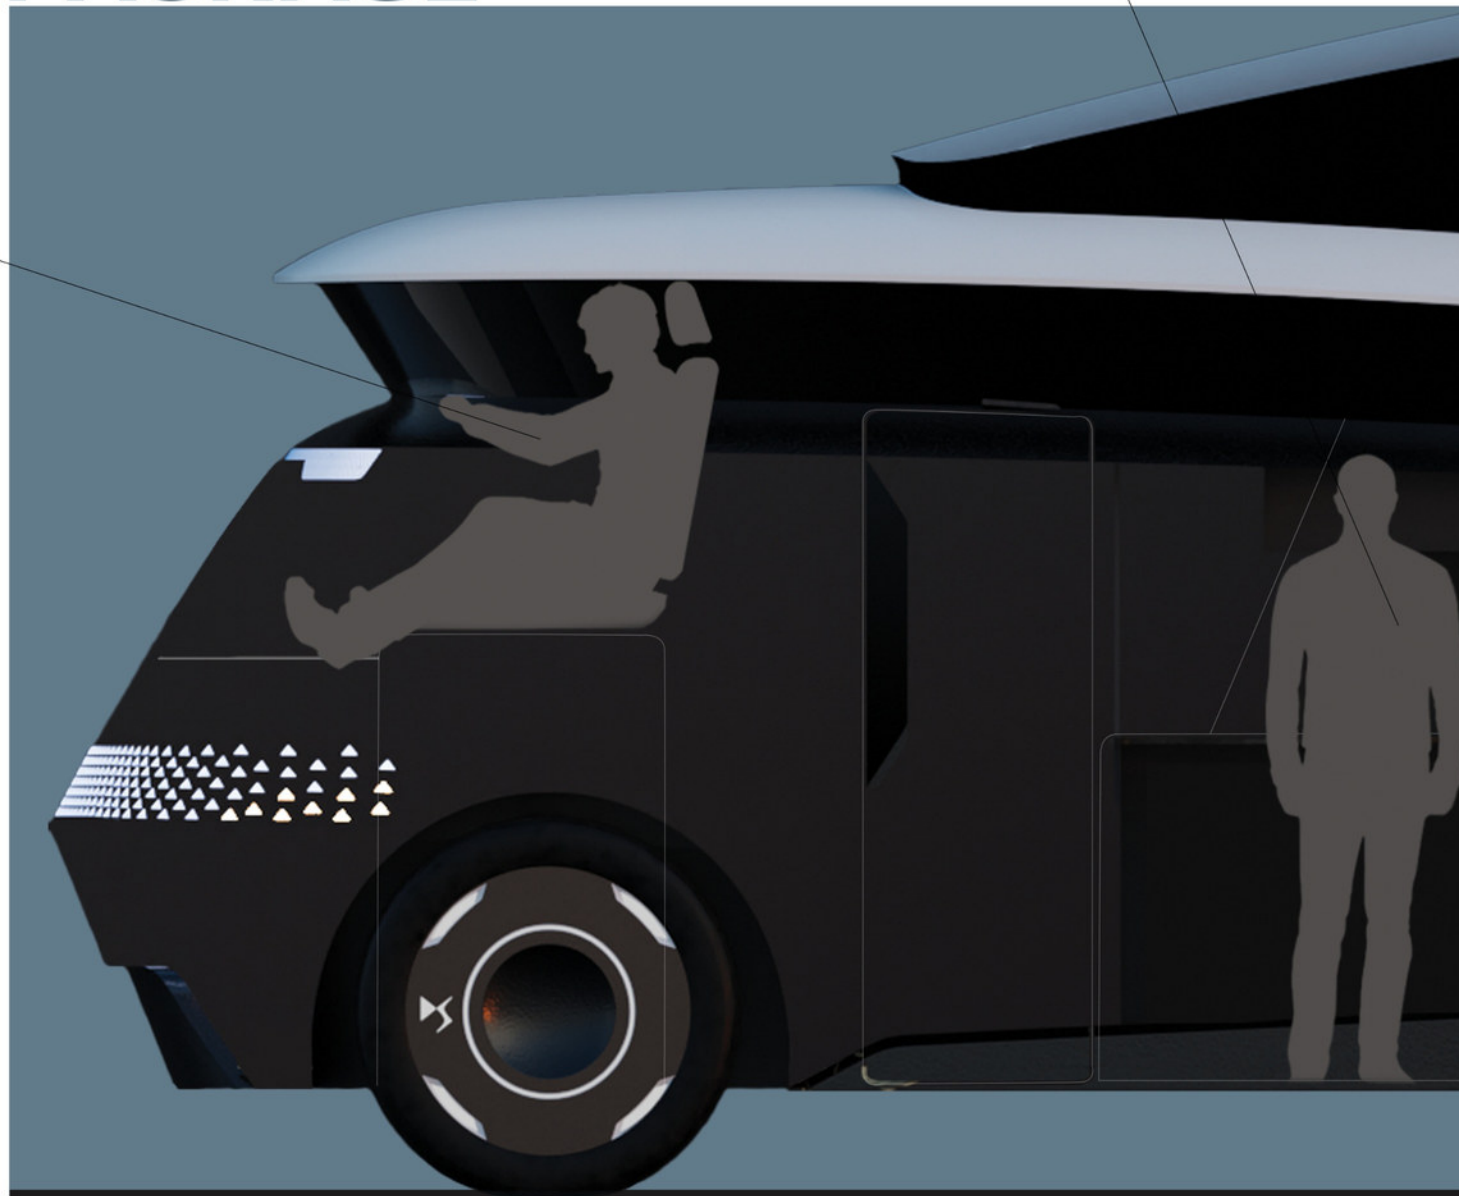

INTERIOR SKETCHES

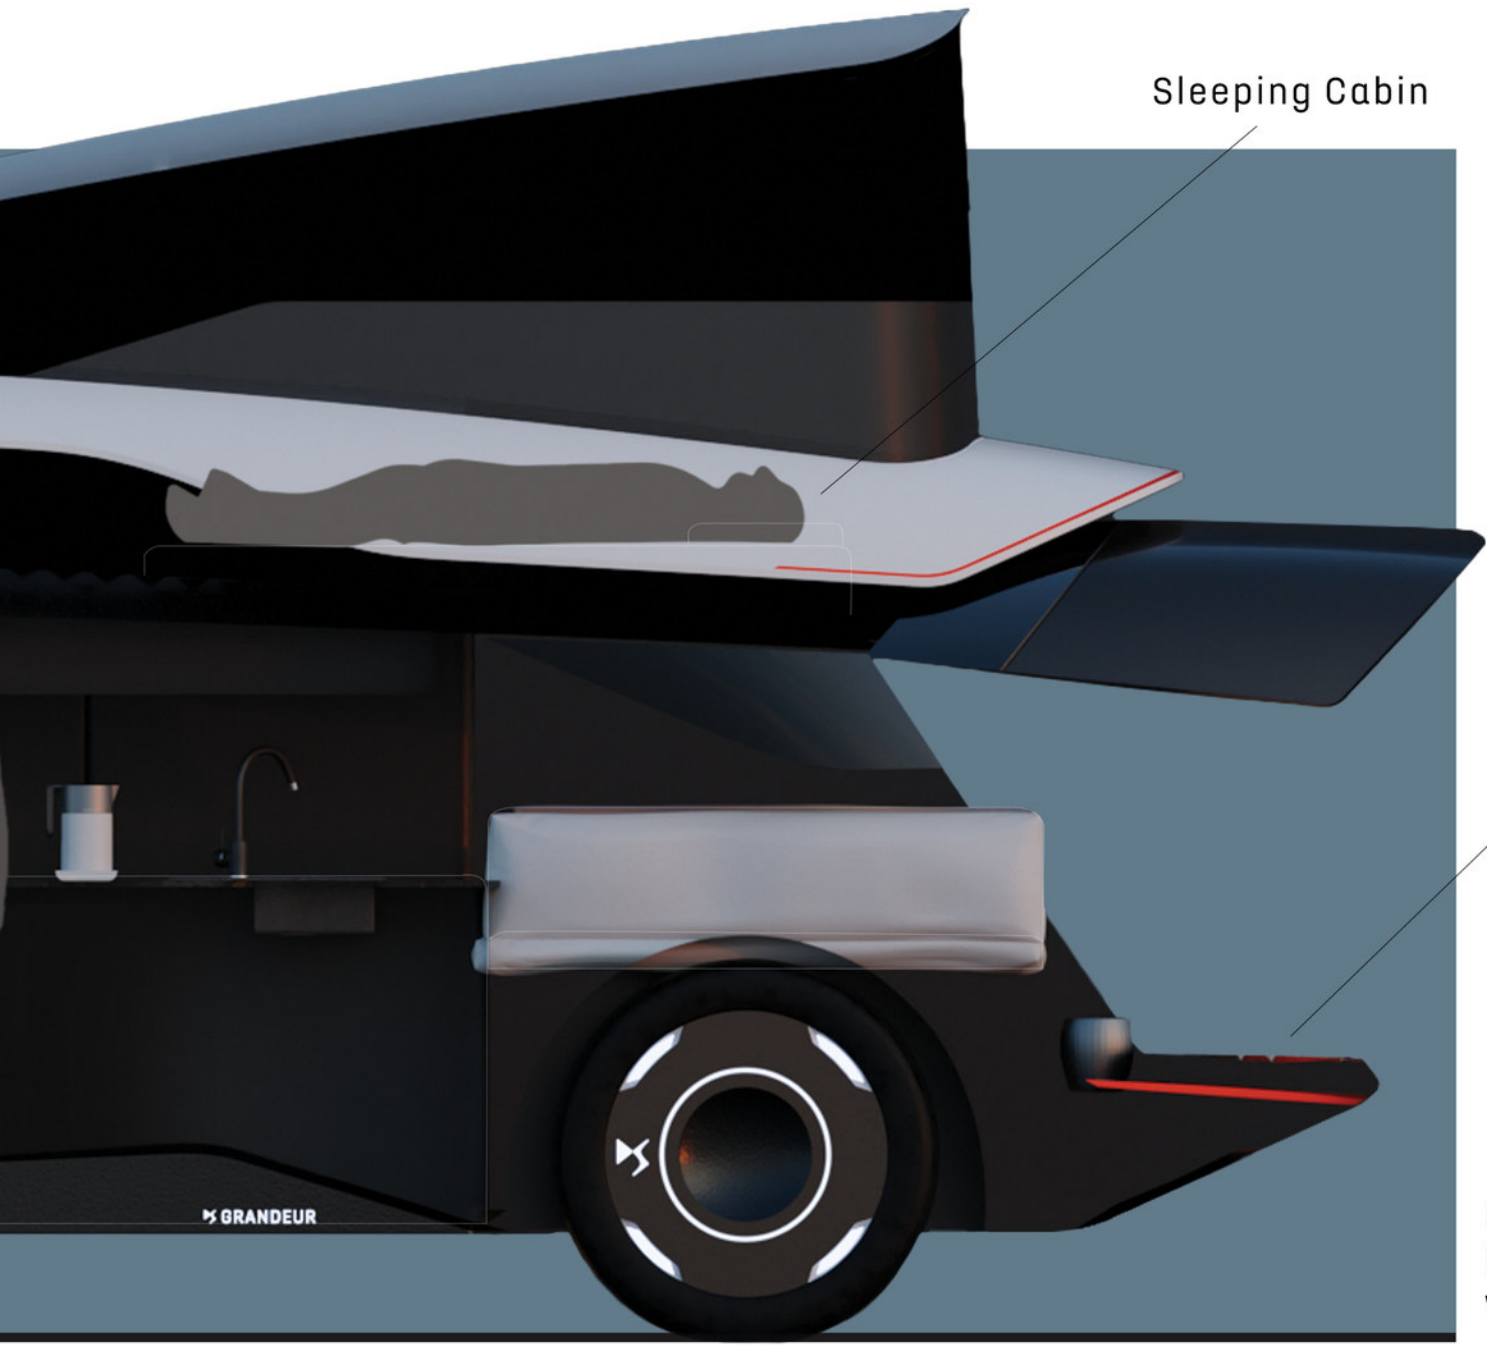

Establishing a interior and interior layout early on in the project was important in being able to decide the dimensions and being able to move forward with the interior as well as exterior. I decided to go for a full living space without having the bed in the same space and have the bed above creating a better living space that is more functional.

GRANDEUR

Length: 7385mm
Height: 3503mm
Width: 2255mm

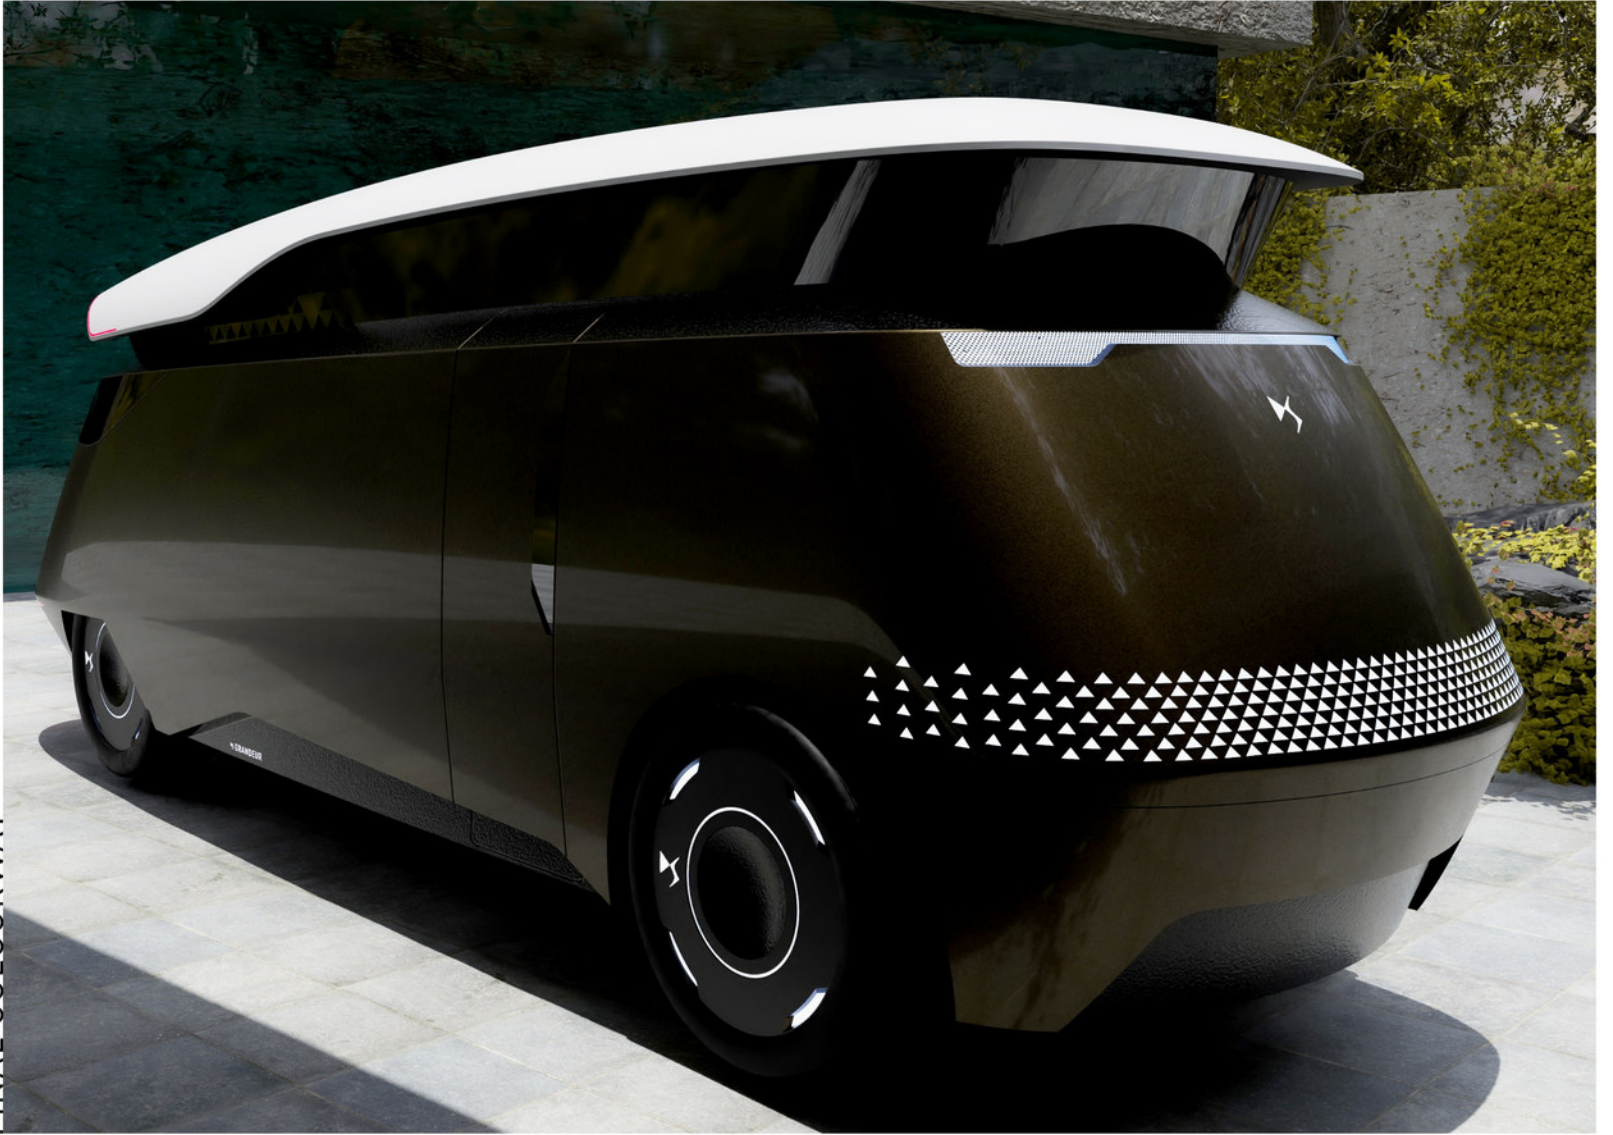

With my final CAD model finished in Alias then transferred into blender I started rendering out different colourways out to see what suited the Grandeur the best.
