

Cydonia is a conceptual project exploring how the first housing development on Mars could come to life.

Taking its name from the Cydonia region of Mars, the project utilises Artificial Intelligence (A.I) imagery through detailed prompt engineering to capture a glimpse of life on Mars.

The Cydonia promotional brochure has been written and designed to illustrate the benefits of purchasing a Cydonia Hab, and to persuade potential Martians to make the journey to the red planet.

Please feel free to flick through the Cydonia promotional brochure, you might be a future Martian yourself...
